

Classic Electric Guitar (EART NK-C1)

Maple Fingerboard, Stainless Steel Frets, Mahogany Wood, Flame Maple Veneer – Blue + Guitar Stand

Starting Bid: \$100

Value: \$385

- Mahogany Body with Flame Maple Veneer: Mahogany is known for superb resonance and rich, lower-mid focused tone. Combined with a gorgeous flame maple veneer, EART NK-C1 is dressed to kill.
- Contoured Body: Traditional model guitars are known to have a “slab” body that have bad ergonomics. NK-C1 has a forearm contour and a belly cut to improve players’ comfort. The scooped heel joint also helps with shredders for easier high frets access.
- Hand Polished Stainless Steel Frets: Stainless steel frets provide unrivaled durability and smooth playing surface for nice and easy big bends. Each fret ends are also hand-dressed for playing comfortability.
- U to C Compound Neck Profile and Compound Radius: NK-C1 has an unique U to C compound neck profile with thicker shoulder on the lower frets, slowly tapers down to a slimmer C to higher frets. Along with a 7.25” to 9.5” compound fingerboard radius, NK-C1 provides excellent playability for both chording and soloing.
